2. Lift arms to carrier position
3. Place upper pin through bracket and post
4. Turn small knob on bracket to the right to remove excess movement

..KÜÖÄT..

(KÖÖ-ÄT)

Recommended procedure for mounting your bike

1. We recommend using four straps per bike
2. Place anti-sway carriage on down tube (use 1 strap)
3. Mount the 3 remaining straps on top tube

4. When mounting multiple bikes, alternate the direction of your handle bars for a better fit
